HOW TO PROTECT YOUR BUSINESS FROM WILDFIRES

BEFORE
- Invest in wildfire-resistant construction
- Maintain your defendible space
- Have a response plan
- Take pictures for insurance
- Determine the most likely direction of a wildfire

DURING
- Monitor local and state info distribution
- Move combustible material away from windows
- Close all windows, doors, and other openings
- Remind employees of response procedures

EVACUATION
- Shut off gas and fuel
- Turn off all machinery and equipment
- Make sure your sprinklers work
- Turn off HVAC equipment
- Ensure that ALL employees evacuate

AFTER
- Initiate your business continuity plan
- Determine steps to recover regular operations
- Consider applying for a Physical Disaster Loan or Economic Injury Disaster Loan
